

Friday 10th July

Reception@blowers.dudley.sch.uk

Happy Friday. It is nearly the weekend and I think the weather is going to be nice and warm.

Thank you for all the film suggestions for our movie night tonight. Molly has chosen to watch Pocahontas 2. Has anyone else seen it?

It's time for our Friday fun dance. This is called If Animals Could Dance. Can you follow the moves of the animals? Send me a picture and I can see if I can guess the animal. <https://safeYouTube.net/w/KgsN>

Today I am going to ask you to sort some animals. How many animals can you think of? Draw them or write them under the correct heading.

4 legs

2 legs

0 legs

duck

What am I?

I have attached a PowerPoint game for you to play. You need to click on the paw prints, read the clues and see if you can guess which pet is being described.

Try and read the clues yourself.

Can you write 4 clues for me to see if I can guess what pet you are describing?
You will win **20 Dojo points**.

Animal guess who game.

You will need two or more people to play this game. Why not get your whole family involved.

Think of an animal. Draw it on a sticker and stick it on another player's forehead. The person with the sticker has to ask questions to find out which animal they are. Take it in turns to be the person with a sticker. If you don't have stickers use a piece of paper and fold it up.

Do I live in the jungle?

Do I have wings?

Do I have a tail?

How many legs do I have?

Am I pet?

I Spy Pet Counting and Adding

Count the number of pet needed to complete each addition number sentence.

$$\text{fish} \quad \square + \text{rabbit} \quad \square = \square$$

$$\text{mouse} \quad \square + \text{turtle} \quad \square = \square$$

$$\text{lizard} \quad \square + \text{snake} \quad \square = \square$$

$$\text{dog} \quad \square + \text{parrot} \quad \square = \square$$

$$\text{chicken} \quad \square + \text{snake} \quad \square = \square$$
