

Good morning Year 2!

How are you today? I loved reading your astronaut applications yesterday, you are all so talented!

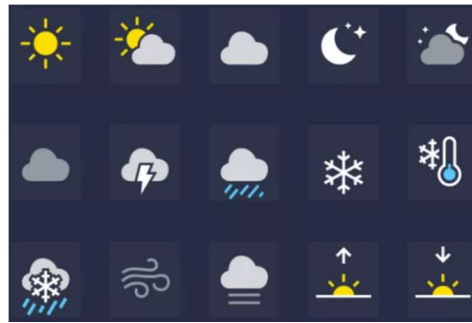

Would you like to be an astronaut when you are older?
What job would you like to do? I have always wanted to travel to space but I would feel very scared. It is so high up!

Email me to tell me, I would love to know!

First job of the day...

Record the today's weather in your weather chart for astronaut Anna.

What is the temperature today?

Find out today's weather here.

<https://www.bbc.co.uk/weather>

You might like to watch the weather forecast too!

Do you ever watch the weather forecast with your parents?

What is the difference between yesterday and today's temperature?

Predict...will tomorrow be warmer or colder?

Our next task, is writing

An aeroplane company is planning on launching flights into space for normal people in the next few years. The trip will include three days of training and a flight into outer space.

Would you like to go? Why or why not?

Tell me why you would or would not like to go. Think about these questions.

1. What might you see in space?
2. Would you like to be in outer space far away from your family on earth?
3. How would it feel to go to space? Remember, most people will never know what space is like!

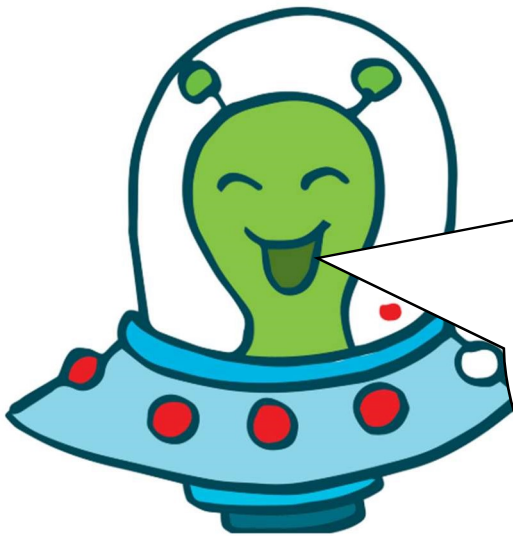

Remember to use capital letters at the start of every sentence, and full stops at the end. You might like to use feelings words to tell me how you might feel, or adjectives and similes to describe what you think you might see in space.

I would love to know what you think, so please email me for 3 dojos!

Last up today, science!

We have been thinking about space today, but now we are going to think about our own planet...

Earth!

Hellllooooo Earthlings!

I am coming for a trip to Earth soon, but I know nothing about what it will be like! I imagine it is a bit different to planet gobayhufershr. You know it don't you?

Could you put together a fact file about your planet so I can be prepared for my trip?

Will you help make an Earth fact file for this alien?!

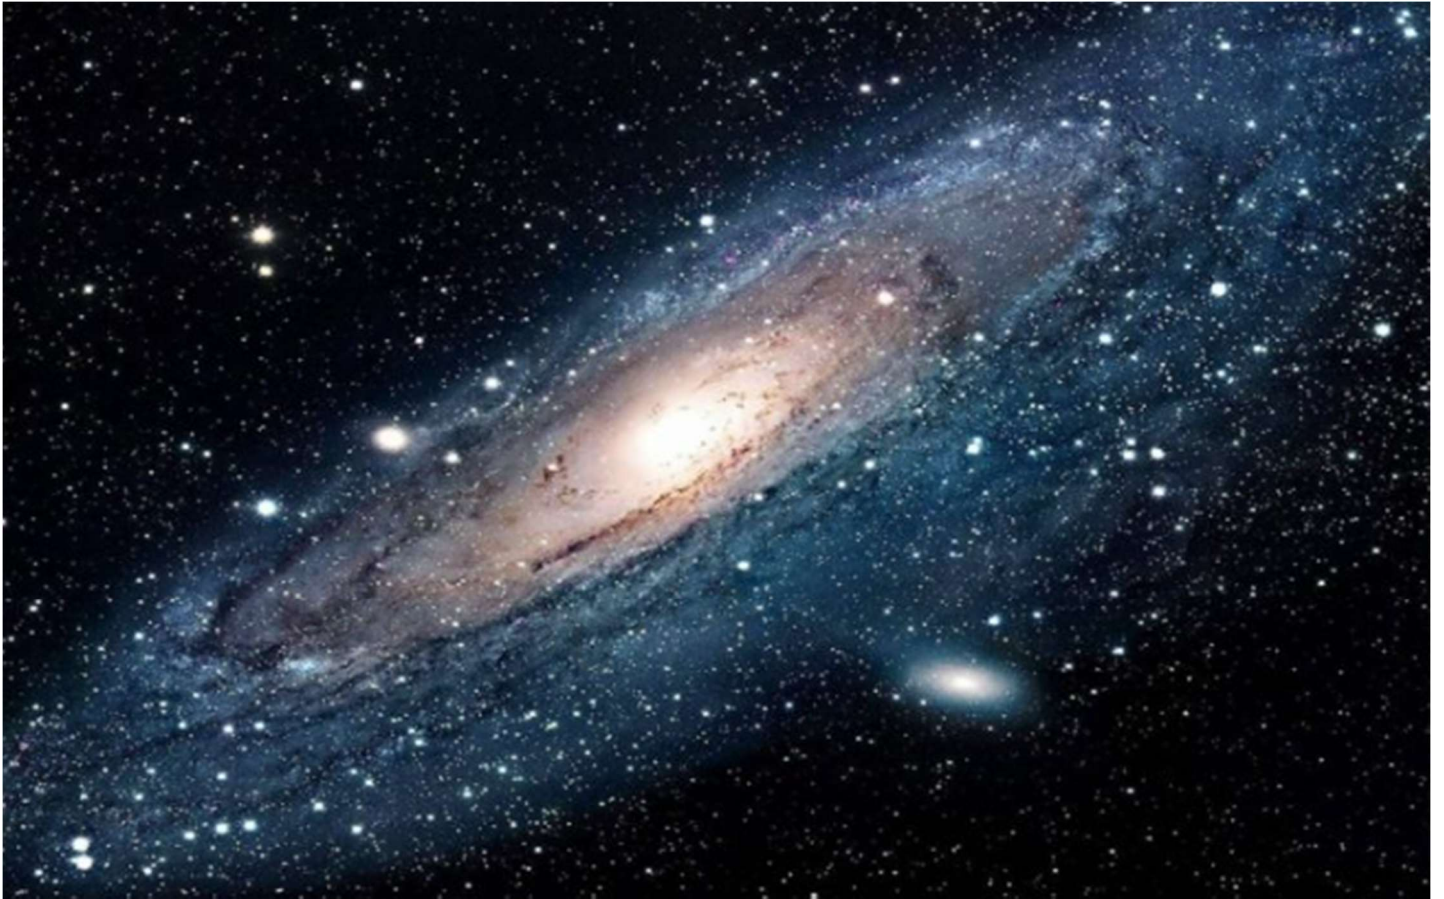

You can present it in any way you would like, you might even like to use the computer. You might like to include answers to these questions, you should remember some of the answers from Geography.

- How many people live on Earth?
- How many countries are there are on Earth?
- How many continents are there on Earth?
- What is the weather like on Earth?

Make sure you present your fact file well, including pictures and writing in your best handwriting!

I can't wait to see your alien fact files!

I hope you have enjoyed thinking about space today...isn't it amazing.

Remember, any issues and please email me on the Year 2 email address. Please take some time to read and get some fresh air today. Remember to practise your challenges too!

Enjoy your day!

Miss Pylypiak-Clancy
