

Tuesday 24th March 2020

Happy Tuesday everyone! Hope we are all safe and happy.

Well done to those of you that accessed the work yesterday and thank you for all your messages.

Here are some tasks for us to have a go at today.

Keep up the hard work and don't forget to keep up your reading - it will make such a difference to your learning.

Science - Electricity

Use the word bank to help you complete the text about **electricity**.

buzzers	insulators	components	
complete circuit	metals	power source	conductors
gaps	motors	circuit	electrons
battery (cell)	mains	light up	switch closes

Electricity is the flow of very tiny particles called _____.

All electrical appliances need a power source, which they get from either a _____ or a _____ supply.

_____ are parts in an electric circuit which does something when electricity flows through them.

Bulbs _____ when electricity passes through them.

_____ make a sound when electricity passes through them.

_____ move when electricity passes through them.

For a bulb to light, a buzzer to sound and a motor to move the circuit must be what we call a _____. This means that there must not be any

_____ in the circuit and the circuit must have a

_____ which opens and _____ the gap in the

circuit.

Most electrical circuits will have a _____,

this enables you to turn your appliances (TV or ipad) on or off.

Electricity flows through wires because they are made with _____ and are

good conductors, but plastic and rubber are not conductors they are called

_____ .
