Our final lesson is art.

Today we are going to have an art lesson with Art John and today we are going to draw one – point perspective.

One-point perspective is a **drawing** method that shows how things appear to get smaller as they get further away, converging towards a single 'vanishing **point**' on the horizon line. It is a way of **drawing** objects upon a flat piece of paper

(or other **drawing** surface) so that they look three-dimensional and realistic.

Please click on the video below and follow the steps on the video.

After this I want you to create your own one-point perspective drawing.
